

ABSTRACT

5       An electrolytic solution, for use in an electrolytic  
capacitor, comprising a solvent and a solute wherein  
water accounts for 20 to 100% by weight of the solvent  
and the total solute content is from 1.5 to 44% by  
weight, and an electrolytic capacitor comprising a  
capacitor element, a case containing the capacitor  
element, and a sealant with which the case is sealed, the  
10       capacitor element comprising a pair of electrode foils  
each comprising a dielectric, a separator for isolating  
the electrode foils from each other, and the above  
electrolytic solution filled between the electrode foils.
